

REGARDED AS ONE OF THE GLOBAL COMPANIES IN THE SECTOR WITH THE HIGHEST GROWTH AND DEVELOPMENT POTENTIAL.

SCHUMANN TANKS CELEBRATES 20 YEARS AT THE SERVICE OF ITS CUSTOMERS, WITH AN INCREASING AWARENESS ABOUT THE IMPORTANCE OF HUMAN ACTION ON THE PLANET.

- More than 20 years of international experience in the practical application of biogas in large-scale plants.
- Around 20 big scale projects every year and more than 70 professionals makes Schumann Tanks a very efficient producer of bolted tanks and installations on a global scale.
- Schumann Tanks has always pursued this vision: To be one of the biggest actors of the global tank industry.
- Schumann Tanks is nowadays one of the few companies worldwide with a high number of 10,000m³ digester tanks in service.

Berlin, 6th August, 2019.- Schumann Tanks, one of the most solvent companies in the global biogas sector, has just turned 20: Two decades of growth at the service of its customers and a 40% growth perspective for the next year.

Part of the success is that the company transfers its many years of experience to the design, manufacturing and assembly departments.

Schumann Tanks works with companies who are changing the world for the better, helping them integrate sustainability into their core by developing strategies, building storing solutions for them and helping them to be part of the global energy transition.

Schumann Tanks is a 100% German Company, regarded as one of the five main players in the global sector, and accounting for 25% of worldwide biodigester tank sales.

Danish Style Digester:

One of the original Schumann Tanks products that has undoubtedly brought growth and development to this company has been the well-known Danish Style Digester.

In the last 5 years, Schumann Tanks has built more than 1.5million m3 of digester volume based on this unique solution.

This type of digester is proven to be an economical alternative to epoxy, glass fused or stainless-steel tanks, and to other technologies like steel welded or concrete.

Schumann Solutions:

Other solutions such as Schumann Solutions, Schumann Glass or Schumann Coating, in addition to its wide portfolio of accessories for tanks of all types, have led this company to position itself as one of the preferred for those customers who demand a quick and professional response in design, manufacture and installation of its tanks.

Peter Schumann, Founder & CEO at Schumann Tanks has dedicated a whole live to tanks.

Hans-Peter Schumann has more than 30 years of experience in the manufacture and installation of bolted steel tanks.

“Think and do different. That's why our main core business is to implement steel bolted tanks all over the world. We have extensive technical knowledge based on our experience in the field. That's why we add value from the first contact we have with our customers.

Our goal is to ensure the quality, service and reliability of our products by transferring our in-house knowledge to the field”

Schumann Tanks help companies and governs to foster a greener and fairer world by 2030.

**“We need to make a change.
Think and do different”**

“In every hour, on the earth, we burn one million tones of oil. We destroy natural resources, environment. Profit, empower and personal advantage have been until now the prior values of industries”- Hans Peter Schumann”- Hans Peter Schumann, Founder & CEO.

“We help our customers to make the world safer, smarter and greener, while they develop their businesses”. - Kristof Willems, International Sales Manager.
